OXFORD: HORACE HART
PRINTER TO THE UNIVERSITY

PREFACE

I DESIRE to express my thanks to Sir Robert K. Douglas, the former Keeper of the Department of Oriental Printed Books and MSS. in the British Museum for permission to publish this MS., and to the present Keeper, Dr. L. D. Barnett, for many courtesies during my work there. To my friend, Mr. W. E. Crum, I am indebted for much kind help, as well as for originally suggesting that I should undertake the work.

H. T.

November, 1908.

INTRODUCTION

Description of the Papyrus.—The papyrus which is here printed for the first time is described in Mr. W. E. Crum's Catalogue of the Coptic MSS. in the British Museum under the no. 951 as follows:—

'Or. 5984.—Papyrus; the remnants of a very fine book, now preserved between glass, in 62 numbered frames. A page when complete (*v.* nos. 61, 62) measured $14\frac{1}{4} \times 10\frac{1}{2}$ in., the whole surface consisting of a single *selis*. The text, in one column of 36–38 lines divided into paragraphs, is written in rounded uncials of Zoega's 3rd or 4th class, ⲁ, ⲗ, ⲙⲙ, ⲩ being each formed of single strokes (ⲁ rarely angular, in two strokes). Initials at the principal sections are enlarged and accompanied by scroll ornaments (*v.* no. 48). Only a few fragts. show their pagination (nos. 4–12), *viz.* from $\overline{\text{ⲕⲍ}}$–$\overline{\text{ⲝ}}$, the alternate figures only being marked (on *versos*), except at the beginnings of quires (no. 5 beg. of qu. $\overline{\text{ⲍ}}$, no. 12 of qu. $\overline{\text{ⲏ}}$). [Rev. C. Murch.]

'The MS. originally contained the books of Proverbs (frames nos. 2–13), Ecclesiastes (nos. 14, 15), Canticles (nos. 16–20), Wisdom (nos. 21–40) and Ecclesiasticus (marked as *Sir.*, nos. 41–62). The paged fragts. are from the first of these, p. $\overline{\text{ⲕⲍ}}$ bearing part of ch. xi. Assuming therefore that the volume opened with Proverbs, we must consider the single small fragt. of Job (from chh. xxxviii, xxxix), framed as no. 1, to belong to another volume; though it is of course possible that each book was given separate pagination. Considerable portions of the other books are preserved. The text of Wisdom and Ecclesiasticus appears to differ only in verbal details from the Turin MS. (*ed.* Lagarde). The differences are often such as might be due to copying or dictation. The archaic doubling of the liquids ⲗ, ⲗ, ⲣ is not found

in this MS. What remains of the *Prologue* to Eccli. is here printed.' Mr. Crum's reprint of the Prologue does not need to be reproduced here as it will be found in its place on p. 126.

A few details may be added to the foregoing description. The papyrus came into the possession of the British Museum in 1901. In regard to size the pages are among the largest known of papyri in codex form [1], the largest dimensions of complete pages being 36·5 cm. height (leaf 61) and 26·5 cm. width (leaves 6, 8). The size of the written *selis* is 28 × 21 cm. (leaf 36) on an average. The number of lines on a complete page ranges between 33 (p. 41 *r*, 62 *v*) and 38 (36 *r*, 49 *r*, *v*), the usual number being 34–36.

The MS. unfortunately is very imperfect, as only 77 leaves or portions of leaves survive out of a probable total of 168 when the codex was complete [2]. The papyrus itself varies a good deal in quality and condition. In parts it is palimpsest, and though the underwriting is not legible [3], the scraping of the surface has affected the condition of the upper writing in parts, especially where, as it seems, it has been exposed to damp. The palimpsest is traceable from leaf 4 b to 13 (Proverbs), it is very slight between 14 and 20 (Eccles. and Cant.), it is more frequent on leaves 21–40 (Sapientia), and from 41 onwards (Sirach) there is no trace of it, and evidently that part of the papyrus was new when it received the present text.

Date.—The MS. is in the same handwriting throughout; the only leaf as to which any doubt can be felt is no. 1, the solitary fragment from the book of Job, but I feel little doubt that it is by the same hand. Unfortunately the leaf is too imperfect to admit of any argument being drawn from the size of either leaf or *selis*; but in the attempt to reconstruct the outward form of the codex (p. viii, infra) it will be found to fit into its place in the scheme. The dating of Coptic MSS. is notoriously a difficult matter, but as regards

[1] Cf. Crum, Cat. Coptic MSS. in Brit. Mus., p. xiii.

[2] Below, p. xvii.

[3] It is most distinct on leaves nos. 6–12 and 21 *r*, 29 *r*, 32 *r*. I have not succeeded in making out the nature of the earlier work, but it was certainly in Coptic.

this MS. Mr. Crum has described it as 'perhaps of the VIth or VIIth century' (Proc. Soc. bibl. Arch. 1902, xxiv 174). I will not venture on any closer definition.

Contents.—The MS. contains parts of certain books of the Old Testament, viz. Job, Proverbs, Ecclesiastes (Eccles.), Song of Songs (Cant.), Wisdom of Solomon (Sap.), and Ecclesiasticus (Sir.). Of Job only one fragment containing a few verses remains; of Proverbs considerable portions of chapters iv to xxiv remain; of Ecclesiastes small fragments; of the Song a considerable portion of the whole; while of Wisdom we have portions of every chapter, and of Sirach the major portion of the work as far as chapter xl. At first sight it might be questioned whether it was worth while to publish so fragmentary a MS.; but when it is considered how very imperfect is our text of the Sahidic version of the Old Testament, and how important that text is, not only in its bearing on our knowledge of the Coptic language and literature, but even on Old Testament criticism in general, it will probably be admitted that publication may be of some use to scholars. A large portion of the text has been printed from other MSS. by Ciasca, Lagarde, and others, yet the following texts are printed in the Sahidic version for the first time:—

Job xxxix 10–12.

Proverbs iv 13–14, 16–27; v complete, though fragmentary in parts; vi 1–11; xii 17–23 (fragmentary, as are also the following portions of this book); xiii 2–10, 13–20, 22–25; xiv 1–5, 8–18, 22–30, 33–35; xv 1–3, 6, 10–15, 17–18, 21–29; xvi 1–9, 11 a–15 a, 20–24, 30–33; xvii 1, 7–10, 17–20 a; xviii 1–4, 13–16; xix 1–3, 10–12, 22–24.

Eccles. ix 4–6.

Cant. i 14 b, 17; ii 1–4, 8–10, 13 a, 17; iii 7, 8 a.

Sap. xvii 4 b, c, 18 a; xviii 7 b, 8; xix 7 a.

Sir. i 1–3 a, 11 b, 12 a; ii 18; iii 8 b–18; viii 17–19; ix 9; x 4 b, 12 b; xxvii 7, 8 a, 22–24; xxix 18 b; xxxi 5 b; xxxix 13 b.

The quality of the text, by comparison with the other MSS., where they exist, is good, though in Sap. it is not

equal to that of the Turin MS. (ed. Lagarde); in Sir., while sometimes inferior to the Turin MS., it is not infrequently superior to it, or at any rate nearer to the version presented by the chief Greek uncials. Where the two MSS. disagree, neither has any consistent support from the other Greek MSS. so far as they are collated in Holmes and Parsons. In Sir. it goes without saying that our MS., like that at Turin, follows the Greek uncials in the misplacing of the sections xxx 25—xxxiii 13 a and xxxiii 13 b—xxxvi 16 a.

A collation with all other printed Sahidic texts of the same portions of the Old Testament has been added.

Form of the Codex.—The volume is incomplete, but it is possible to reconstruct it to some extent. At present there are 77 leaves or portions of leaves (besides one fragment unassigned) distributed among the different books as follows: Job 1, Proverbs 23, Ecclesiastes 3, Song of Songs (Cant.) 6, Wisdom 20, Sirach 24. Page-numeration is found only on the leaves of Proverbs[1], which are numbered on the *verso* with numbers ranging from 24 to 61 in alternate numbers, 24, 26, &c.[2]: hence the *recto* was regarded as having a number, though bearing none except when it is the first page of a new quire (leaf 8 b, 12 a). Quire-signatures also occur on fo. 5 a *recto* $\overline{\varsigma}$ (beginning) and 8 a *verso* $\overline{\varsigma}$ (end of quire), on 8 b *recto* $\overline{\zeta}$ (beginning) and 11 c *verso* $\overline{\zeta}$ (end of quire) and 12 a *recto* $\overline{\text{H}}$. This shows us that the codex consisted of sheets arranged in quaternions, each sheet consisting of two leaves which were folded so that when formed into a quaternion the quire consists of eight leaves, of which the first four had horizontal fibres on the *recto* and vertical fibres on the *verso* (=HV), and the following

[1] In Eccles. and Cant. there are traces of pagination on the top left-hand corner of three pages, viz. $\overline{\text{K}}$ on 14 b *verso*, $\overline{\lambda}$ on 16 a *verso*, and perhaps $\overline{\text{H}}$ or $\overline{\pi}$ on 17 *recto*, but all except the first are so effaced as to be very uncertain, and I believe they are the effaced numbering of a palimpsest writing. The papyrus in this part is not well preserved and gives the impression of having been used before and cleaned.

[2] The scribe has inadvertently left out the number 38, marking the *recto* of leaf 8 b $\overline{\lambda\zeta}$ and the *verso* $\overline{\lambda\theta}$, and then continuing with the series 41, 43, &c., to 61.

four leaves had vertical fibres on the *recto* and horizontal fibres on the *verso* (=VH). It is convenient to set out the relations of the leaves with respect to fibres, &c., in a tabular form:—

TABLE I

(The MS. in its present condition)

In the above table the first column gives the numbers of the glass frames in which the leaves have been mounted. Where more fragments than one are mounted in a single frame, they are distinguished as a, b, c, &c. The text enables us to say which of the leaves were originally contiguous, and this is indicated by the black line in the second column. Where there is a gap, there is usually no difficulty in calcu-

lating how many leaves have disappeared by counting the lines of the Greek text and reckoning how many lines of Greek text correspond to a leaf of Coptic text; thus, in the gap between fo. 3 and 4 a (Prov. vi 11 to viii 35) there are 176 ll. in Greek, and as fos. 2 and 3 (=Prov. iv 16 to vi 11, adding 7 ll. for the missing top of fo. 2 calculated from the average number of lines in a page of the MS.) contain c. 116 ll. in Greek or c. 58 to a Coptic leaf, obviously the missing 176 ll. Greek must represent three lost leaves of Coptic between 3 and 4 a. This enables us to reconstitute quire ϵ thus:—

No. of leaf	Original pagination	Fibres
[i	5-6	HV]
[ii	7-8	HV]
2	[9-10]	HV
3	[11-12]	HV
[iii	13-14	VH]
[iv	15-16	VH]
[v	17-18	VH]
4a	[19-20]	VH

The roman numerals represent the missing leaves; the pagination is obtained by counting back from the earliest existing number, 24 on fo. 5 b *verso*, fos. 2, 3, and 4 a having lost their pagination by the corners of the papyrus being broken. Since we know that 4 a is the last leaf of a quire and fo. 3 is HV, the quire could not have been a quinion, as is the case once, at the beginning of Sapientia. Now the missing beginning of Proverbs from i 1 to iv 16 where fo. 2 begins= 113 ll. in Greek=2 leaves Coptic. Therefore the book of Proverbs began at quire ϵ. Sapientia and Sirach also begin at the commencement of a new quire. What is strange is that the pagination of Proverbs thus began at p. 5; and I can only suggest that originally Proverbs was a separate codex and had two blank but numbered leaves at the beginning, as was the case in the London Psalter (Earliest Known Coptic Psalter, ed. E. A. Wallis Budge, p. ix),

though in the latter instance the blank leaves were not numbered.

Fo. 12 d ends at Prov. xxiv 13, and from that point to the end is a lacuna. It is possible to calculate that 12 a contained the Coptic equivalent of 48 ll. of Greek, 12 b 55 ll., and 12 c 49 ll.; thus we may safely take 50 ll. Greek as about the equivalent of a leaf of Coptic in this part. Now from Prov. xxiv 13 to the end the Greek text contains 512 lines; therefore ten leaves may be taken as missing after 12 d to the end of Proverbs.

Since Proverbs began at quire ϵ, we must assume that the quire numbers were added after the several books had been gathered together into one volume. Four quires are left at the beginning to be accounted for. There is one fragmentary leaf of the book of Job (fo. 1) apparently in the same handwriting as the rest of the MS., and as far as one can judge a part of it. Now the book of Job in the Sahidic version was the short one of the pre-Origenic LXX, which in round numbers was shorter by about 380 *stichoi* than that which is found in our chief uncials (Ciasca, Sacr. Bibl. frag. copto-sah. ii. p. xxxiii). Swete gives the number of *stichoi* in Job as 2153 (cod. B) as compared with 1124 for Sapientia. Subtracting 380 from 2153 we have 1773 for Job compared with 1124 for Sapientia. These 1124 *stichoi* take up 21 leaves of our MS. Therefore 1773 would take 33 leaves, which, considering the rough nature of the basis of computation, is sufficiently near to the 32 required for four quires (quaternions) to be accepted. Thus we may fairly assume that the volume began with Job in the usual Sahidic version.

Ecclesiastes i 1—vi 6 is missing. From the remains of fos. 14 a, 15, and 14 b and the one leaf missing between 14 a and 15 an average of about 53 lines of Greek text may be taken as the equivalent of a Coptic leaf in this book. The initial lacuna is represented by 370 ll. Greek less about 12 for the lost top of fo. 14 a = 358 lines. Thus in all probability seven leaves are missing here. Similarly from ix 6 to the end there is a gap of 177 ll. in the Greek = $3\frac{1}{2}$ leaves Coptic, while at the beginning of Cant. before

fo. 16 a + b we have 33 short lines (Greek) which it would be quite possible to get into one page, since fos. 17, 18, 19 (Cant. iv 3 to vii 13, where the Greek lines are rather longer) contain about 50, 60, and 55 Greek lines respectively, or an average of 55. Since the end of Eccles. requires almost exactly $3\frac{1}{2}$ leaves and the beginning of Cant. one page, i.e. half a leaf, it would seem that in the case of the latter short book it was not thought necessary to commence a new quire for it. At the end of Cant. the arrangement of the fibres seems to indicate that a blank page was left between it and Sap. which follows.

The first Wisdom book (Sap.) begins a new quire, in this sole instance a quinion, which is followed by a quaternion, and then, as only a very small portion of the book remained to be written, the scribe seems to have taken another sheet which he folded and wrote in the unusual order VH–HV, and then found that one more leaf was wanted which is now missing. He started Sirach on a new quire which proceeds, so far as we have it, in the following order :—two quaternions, a ternion, and two more quaternions. The numbers of the missing leaves work out with certainty by calculation from the Greek text.

The foregoing tedious details may now be gathered up into the following table which, though hypothetical in one or two minor points, can scarcely be altered in its main outlines.

TABLE II

The missing portion of Sirach would require about 13 more leaves, i. e. two more quaternions inclusive of fos. 61 and 62, which begin a quire. Supposing the whole codex to have ended there, it would have consisted of 336 pages (168 fos.).

The printing of this edition.—The MS. has been printed in this edition in such a way as to reproduce it as far as possible under the rigid conditions of type. The length of the lines, their inset, the carrying up of the ends of a line into the blank space of the line above it, the occasional interlinications have all been reproduced; as also the superlineation which has occasionally, but rarely, been inserted where it would be expected, but has probably been broken away. It was felt that, if omitted, its absence might lead to a wrong inference being drawn, and, in the defective condition of the MS., to mention every instance in the notes of such insertion would overload them. On the other hand, where an expected superlineation is omitted, it may be assumed that the condition of the papyrus enables it to be said that there never was any originally. Likewise with regard to punctuation, it is very difficult on faded parts of the MS. to be sure whether one or two dots were originally present, and therefore too much stress must not be laid on it. For convenience in reading the words of the Coptic text have been divided in the usual way.

In the collation no notice has been taken of certain small differences between this MS. and the Turin MS. (Lagarde) of the two Wisdoms, which are of frequent occurrence, viz. in Lagarde ⲉⲛ for ⲉⲉⲛ, ⲉⲓ for ⲓ in both Greek and Coptic words, the assimilated definite article ⲡ̄ⲣⲣⲱ for ⲡⲣⲱ, &c., or any difference in superlineation or dots over ⲓ or in punctuation.

The numbering of verses adopted by Swete in his edition of the Septuagint (Cambridge, 1895–9) has been followed, but Lagarde's numbering, where it differs in Sapientia and Sirach, has been inserted in brackets.

Abbreviations.—The following abbreviations have been made use of:—

Ciasca = Sacrorum Bibliorum fragmenta copto-sahidica musei Borgiani stud. P. Aug. Ciasca edita Rom., 1885–9.

Cod. Par. 43, 44 = the Coptic scalae at Paris which are here quoted at second hand from Maspero infra. The frequent variants of spelling in these codices have not always been quoted.

Gk. = a reading common to the chief Greek uncials as given by Swete, The Old Testament in Greek, Cambr., 1896.

Lag. = Lagarde's edition of the Turin MS. of Sapientia and Ecclesiasticus in his Aegyptiaca, Gött., 1883.

Masp. = Maspero, Fragments de la version thébaine de l'ancien Testament in Miss. Arch. française, vi 191 seq., Cairo, 1892.

Ming. = Mingarelli Aegyptiorum codicum reliquiae Venetiis in bibliotheca Naniana asservatae Bonon., 1785.

Rossi = Papiri copti del museo Torinese, 1889.

Z = Zoega Catalogus codicum copticorum Rom., 1810.

COPTIC (SAHIDIC) VERSION OF CERTAIN BOOKS OF THE OLD TESTAMENT

iv For this chapter of Prov. there is no printed Sahidic text for comparison. The Boh. text has been printed by Lagarde, Psalt. Memph. p. 139 seq. (MS. Berlin) and by Bouriant, Rec. tr. iii 126 and Bsciai, Rome 1886 (MS. Cairo). I subjoin here a fragment in the Brit. Mus. (MS. Or. 3579 A, Cat. no. 39) which gives a Sah. text of vv. 13, 14, 17, 18, 22, 23, 27— 13 ⲁⲙⲙⲁϩⲧⲉ ⲛ̄ⲧⲁⲥⲃⲱ ⲙⲙⲉⲣⲕⲁⲁⲥ ⲛ̄ⲥⲱⲕ ϩⲁⲣⲉϩ ⲉ̣ⲣⲟⲥ ⲛⲁⲕ ⲉⲡⲉⲕⲁ̣ⲣ̣ⲉ 14 ⲙⲙⲉⲣⲙⲟⲟ[ⲩⲉ] ϩ̄ⲛⲛⲉϩⲓⲟ [ⲟⲩⲉ] . . . . . 17 . . . ⲟⲩⲏⲣ̄ⲡ ⲡⲣⲉϥⲣ̄ⲡⲟⲃⲉ 18 ⲛ̄ⲉϩⲓⲟⲟⲩⲉ

ⲉ̄ⲛ̄ⲛⲉϥⲉⲃⲏⲩⲉ:
ⲛⲉⲧⲛⲁⲉⲧⲉ ⲉⲡϫⲟⲉⲓⲥ ⲛ̣ⲁ̣ⲣ̄ⲙⲙⲁⲕⲁⲣⲓⲟⲥ·
21 ϣⲁⲩⲙⲟⲩⲧⲉ ⲉⲡⲥⲟⲫⲟⲥ ⲙⲙⲛ̄ⲛ̄ⲥⲁⲃⲉⲉⲩ
ϫⲉ ⲛⲉⲧⲥⲟϣϥ·
ϣⲁⲩⲥⲱⲧⲙ̄ ⲁⲉ ⲛ̄ⲉⲟⲩⲟ ⲉⲛⲛⲉⲧⲛⲟⲧⲙ̄
ⲉⲙⲙⲛⲉⲩϣ[ⲁ]ϫⲉ:
22 ⲟⲩⲛⲏⲩ ⲛ̄ⲱ[ⲛ̄ⲉ] ⲛⲉ ⲡ[ⲙⲉⲉⲩⲉ ⲉ]ⲧⲛⲁ
ⲛⲟⲩϥ ⲙⲙⲛ̣[ ]
ⲧⲉⲥⲃⲱ ⲁⲉ ⲛ̄ⲛ[ⲁⲟⲏⲧ . . .]
23 ϣⲁⲣⲉⲡⲉⲏⲧ[ⲙⲛ̄ⲥⲟⲫⲟⲥ ⲛⲟⲩ ⲛ̄ⲛⲉⲧ]
ⲛⲏⲩ ⲉⲃ̣ⲟⲗ ⲉ̣ⲓ̣[ ]
ϥⲛⲁⲫⲟ̣[ⲣⲓ]ⲩ
24 ⲉⲉⲛⲙⲙⲟ[ⲩⲗⲉ ⲛ̄ⲉⲃⲓⲱ]ⲉ̣ⲟⲫⲓ

15 a There is no Greek text corresponding to these lines. Between vers. 15–20 comes probably the fragment 13 a *recto* (horiz. fibres, mounted as *verso*), but the letters are too few and uncertain to allow of identification in the absence of any other text 23[3] Mingarelli, p. 119, has a passage ⲛⲉⲧⲫⲟⲣⲉⲓ ⲙⲙⲛ̄ⲥⲟⲟⲩⲛ̄ ⲙⲙⲁⲉ ⲉⲛⲛⲉⲩⲥⲡⲟⲧⲟⲩ which he refers to this verse, but perhaps it is not a strict quotation

Prov.
xvi ⲡⲉϩⲗⲟϭ ⲍⲉ[ ]
ⲙⲙⲯⲧ[ⲭⲏ

ⲛ̄ⲛⲁⲑⲏⲧ·
ⲟⲩⲁⲉ ⲥⲛⲟⲧⲟⲩ ⲛ̄ⲥⲟⲗ ⲛ̄ⲛ̄ⲁⲓⲕⲁⲓⲟⲥ

ver. 26 Probably to this verse should be assigned the fragment 13 a *verso* (vert. fibres, mounted as *recto*); but it cannot be identified with certainty in the absence of another text for comparison 33[3] [ⲙⲙ̄ⲛ̄ⲧ]ⲙⲙⲉ] The three letters in the bracket lost, but the long superlineation remains and renders the restoration certain

xvii vers. 14-16, 20-22, 28 have been printed by Rossi

In the Canticum the Borgian MSS. fail us except in iv 14—v 5 (Ciasca); but Maspero gives a text from MSS. in the Bib. Nat. which is complete except i 7—iii 7, and he has also collected all the quotations from printed sources and some from unprinted or partly printed sources, including codd. Par. 43, 44 (Scalae) and MS. 193 of Naples. I have reproduced the variants here, as shortly as possible, but so far only as they cover the limits of our text. i 13^1 [ⲟⲩⲙⲙⲁϊⲣⲉ] codd.
